

Human Rights Protection Cell

"All human beings are born free and equal in dignity and rights."

In our college, a Human Rights Protection unit was established in the 2020-2021 academic year. The cell's goal is to raise faculty and student understanding of human rights. Additionally, it strives to support students' entire growth and give them the tools they need to live honourable, dignified lives free from violations of others' rights.

Aim: Enable, Empower, Educate.

Objectives

- To use workshops and seminars to raise understanding of human rights among staff, students, and faculty
- Arranging a variety of awareness programmes in order to raise awareness of human rights issues and improve the understanding of them among those close to the college.
- Students should be empowered and encouraged to make the most use of their rights and obligations.
- To cultivate in our Students the virtues of citizenship
- Give a critical analysis and interdisciplinary approach to current human rights concerns while upholding ethics and moral principles.

Functions and Accountability

- To promote an atmosphere of mutual respect and understanding for each person's rights and dignity
- To stop, denounce, and discourage other people's harassment and prejudice.
- To elevate the universal obligations that all people have to society, regardless of their sex, nationality, religion, or race
